## 2019 INFINITI Q50 AT A GLANCE

---

After receiving significant updating for the 2018 model year, the popular INFINITI Q50 sports sedan enters 2019 with a streamlined model lineup and the addition of standard Forward Emergency Braking and Predictive Forward Collision Warning. As in previous years, Q50 continues to offer innovative technologies designed to empower and support the driver.

The 2019 INFINITI Q50 2.0t has been deleted. The INFINITI Q50 3.0t is again available in a choice of 300-horsepower or 400-horsepower 3.0-litre twin-turbocharged V6 engines. It is also offered in LUXE, Signature Edition, SPORT and a new special edition model equipped exclusively for Canada: the I-LINE RED SPORT.

The Q50 exterior design features sleek proportions and an athletic stance. Starting from the Q50 3.0t Signature edition, the Q50 includes a more angular front bumper and wider, lower air intakes, adding greater visual potency over the Q50 LUXE designs.

Inside, the 2019 Q50 features a high level of artistry throughout the high-tech cabin, providing a comfortable and connected space. Each grade level comes with its own unique interior character. Interior features include the brand's spinal support seats that ensure a comfortable space, a steering wheel with molded positions for the driver's thumbs, and INFINITI InTouch™ Services designed to effortlessly synchronize the car and driver.

Innovative driver assistance technologies that empower and support the driver are abundant on the Q50. They include available Direct Adaptive Steering, Active Lane Control, Intelligent Cruise Control, Distance Control Assist, Backup Collision Intervention, Blind Spot Warning and Blind Spot Intervention, and Lane Departure Warning and Prevention.

---

The 2019 Q50 again delivers a rewarding driving experience with a variety innovative powertrain options. Leading the list of two available 2019 Q50 powerplants is the exclusive VR-series 3.0-litre V6 twin-turbo engine with 300 standard horsepower. A high-output 400 horsepower version is standard on I-LINE RED SPORT. The 3.0-litre V6, has been engineered to blend responsive performance with enhanced fuel efficiency.

All 2019 Q50 models come equipped with a refined 7-speed automatic transmission with available paddle shifters. The INFINITI Drive Mode Selector with Snow, Eco, Standard, Sport and Personal settings is also standard on all models. It is part of the INFINITI InTuition™ System, an advanced customizable digital environment system that allows drivers to create unique settings for engine, suspension and steering (when equipped with INFINITI Direct Adaptive Steering) settings.

Among the Q50's available advanced drivetrain technologies is the second-generation Direct Adaptive Steering, with a selection of steering modes accessed through the Drive Mode Selector. Located on the center console, Drive Mode Selector allows the steering effort and response to be selected from six available options: Personal, Standard, Snow, Eco, Sport, and Sport+. It is available on all models as part of the ProACTIVE Package. The Q50 also features available Dynamic Digital Suspension. Standard on the Q50 3.0t SPORT and I-LINE RED SPORT, it provides an optimal blend of ride comfort, response and agility. The shift from a comfort-biased ride to enhanced dynamic response can be made when the driver selects either Sport or Sport+ mode (adjusted via the Drive Mode Selector) which changes the electronically adjustable shock absorbers to provide firmer damping control for more agile handling. While in these modes, the suspension is constantly adjusting to provide ideal performance and a flat ride.

Highlights of the 2019 INFINITI Q50 include:

Design

- Standard sport front and rear fascias for 3.0t Signature Edition, 3.0t SPORT and I-LINE RED SPORT models
- INFINITI signature double-arch front grille, dynamic arch silhouette and crescent-cut C-pillar
