**2022 INFINITI QX50 impresses with standard ProPILOT Assist,  
wireless Apple CarPlay, added convenience features**

Mississauga, Ont. – Curated materials, remarkable craftsmanship, and now connectivity with the capability to further support drivers, the 2022 INFINITI QX50 arrives with wireless Apple CarPlay compatibility and ProPILOT Assist technology newly standard on all grades of the mid-size crossover starting at \$47,995 MSRP.

In addition to Wireless Apple CarPlay and ProPILOT Assist, all grades of the 2022 QX50 now include convenience features such as a Type-C USB charge port for rear passengers, rear door-activated Intelligent Key entry, LED welcome lights on the rear door handles and an auto-dimming rearview mirror.

The 2022 QX50 is available in four well-equipped grades – PURE, LUXE I-LINE, SENSORY and AUTOGRAPH – with standard Intelligent All-Wheel-Drive. All 2022 QX50 models are powered by an award-winning and world's first variable-compression turbocharged (VC-Turbo) engine that produces 268 horsepower with a combined fuel economy of 9.7L/100km, based on the EPA cycle.

Exceptional convenience features such as auto-folding heated outside mirrors, 4-way driver power lumbar adjustment, panoramic moonroof and leather-appointed seats are standard beginning on QX50 LUXE I-LINE models. The updated 2022 QX50 LUXE I-LINE adds daring appearance touches including 20-inch wheels, black exterior accents, exclusive rear I-LINE badge, and more. The 2022 QX50 LUXE I-LINE starts at \$51,495 MSRP. The QX50 SENSORY adds semi-aniline leather-appointed seats, motion-activated liftgate, climate-

controlled front seats, heated second-row (outboard seats), 4-way passenger power lumbar adjustment, Bose® Performance Series audio and more which starts at \$56,495 MSRP.

### **Advanced human artistry inside**

The 2022 QX50 elevates driving daily with a carefully considered, handcrafted interior showcasing curated materials with "wrap-and-sew" highlights and contrast-colour stitching paired with piping. Up to five fit in comfort within the 2022 QX50 thanks to a sliding rear bench seat that maximizes available cargo or passenger space with the second row upright, or folds forward for up to 1,842.3L of cargo capacity behind the front seats.

All QX50 crossovers coddle passengers with 8-way adjustable front seats, dual-zone automatic climate control, a leather-wrapped heated steering wheel, and a dual touch screen INFINITI InTouch infotainment system (8-inch upper, 7-inch lower) with wireless Apple CarPlay and USB-based Android Auto. A Wi-Fi hotspot can support up to seven devices with on-the-go information and entertainment, and INFINITI InTouch Services offers both convenience such as remote engine start from smartphone or smartwatch, as well as peace of mind with automatic collision notification and emergency call services.

INFINITI designers realized the traditional Japanese concepts of "mitate" and "shitate" by combining refined materials and expert craftsmanship to enhance the natural characteristics of items throughout the cabin. For 2022, supple semi-aniline leather-appointed seats are included on QX50 SENSORY grades, and QX50 LUXE I-LINE grade receives rich leather-appointed seating surfaces.

Heated rear outboard seats and decadent Ultrasuede® interior trim accents are standard on QX50 SENSORY grades<sup>i</sup>, which are new for 2022. Additionally, a 16-speaker Bose Performance Series premium audio system is included from QX50 SENSORY grade for crystal-clear audio inside the QX50's spacious confines.

The 2022 QX50 AUTOGRAPH starts at \$59,995 MSRP and exemplifies outstanding modern Japanese luxury with tri-zone automatic climate control, quilted-stitch seat surfaces, enhanced interior ambient lighting, advanced climate control system, and natural open-pore maple wood accents.

The interior of the QX50 is tastefully finished in one of three shades of leather- or leatherette-appointed seats: graphite, wheat, or white, with accompanying painted aluminum, textured aluminum, or natural open-pore maple wood trim accents.

### **Powerful elegance outside**

The 2022 QX50 reaches deeply into INFINTI's Japanese DNA with organic, artistic lines and strong, muscular proportions. INFINTI's double-arch grille features prominently and gives the QX50 a distinctive and distinguished arrival wherever it goes. The QX50's "human-eye" headlights are simultaneously alluring and intense, and this year are enhanced with black accents on QX50 PURE and LUXE I-LINE grades.

Along the body sides, INFINTI's signature crescent-shaped rear roof pillar visually extends the crossover's roofline, arching elegantly toward a standard power rear liftgate. QX50 AUTOGRAPH and, new for 2022, QX50 SENSORY, grades include a motion-activated sensor for hands-free liftgate operation.

The updated QX50 LUXE I-LINE includes tasteful accents such as 20-inch black-painted and machine-finished wheels, black outside mirror caps, body colour rear diffuser, graphite headliner, black mesh grille, black fender accents, and a black liftgate finisher.

A panoramic moonroof is included on most QX50 grades and visually enhances the interior space by flooding the cabin with warming natural light during the day or cool ambiance at night.

Eight captivating exterior colours are available: Hermosa Blue, Mineral Black, Graphite Shadow, Black Obsidian, Majestic White, Lunar White, striking Dynamic Sunstone Red and, new for 2022, Slate Gray.

### **Technologically advanced, human-centered drive**

Powering every 2022 QX50 is the world's first mass-production variable-compression turbocharged (VC-Turbo) engine that helps to deliver enhanced efficiency or dynamic power, based on the driver's input.

At its heart, a 2.0-litre VC-Turbo inline-4 engine produces 268 horsepower and 280 pound-feet of torque thanks to a seamlessly integrated system that can imperceptibly lengthen or shorten the stroke of each cylinder for efficiency or power.

That engine is paired to an advanced XTRONIC continuously variable transmission (CVT) with Downshift Rev Matching and standard steering-wheel-mounted paddle shifters. The powertrain propels the QX50's all four wheels with INFINITI's standard Intelligent All-Wheel-Drive system. Together, the VC-Turbo and CVT offer an empowering drive experience with efficiency and refinement.

The Intelligent All-Wheel Drive can direct up to 50% of the QX50's available power toward the rear wheels for enhanced all-weather confidence. A standard shift-by-wire system is more compact than traditional mechanical linkages, freeing up more interior space while offering quicker shifts when engaged in manual mode.

New for 2022, every QX50 is equipped with advanced ProPILOT Assist technology to support the driver during single-lane travel on selected highways. When engaged, ProPILOT Assist can help the driver travel stay centered within their lane, brake, or accelerate, and resume travel from a complete stop after a short time.

To further support the driver, Blind Spot Warning and Intervention, Lane Departure Warning and Prevention, Forward Emergency Braking with pedestrian detection, Predictive Forward Collision Warning, Rear Automatic Braking, and Rear Cross Traffic Alert are standard on all QX50 grades.

The 2022 QX50 complements the range of new INFINITI utility vehicles, including the new 2022 QX80 SUV, all-new 2022 QX55 crossover, and all-new 2022 QX60 three-row SUV. Wireless Apple CarPlay is standard on all 2022 INFINITI models – including the Q60 coupe and Q50 sports sedan – along with USB-based Android Auto.

The 2022 INFINITI QX50 arrives in Canadian showrooms in late 2021, with other markets to follow. For more information, visit INFINITI's Global Newsroom.

### **About INFINITI**

INFINITI Motor Company is headquartered in Yokohama, Japan with operations around the world including regional offices based in the Americas, China and INFINITI International Markets based in Dubai. The INFINITI brand of premium automobiles are assembled in manufacturing facilities in Japan, North America and China. INFINITI design studios are located in Atsugi-Shi near Yokohama, London, San Diego and Beijing.
