Canadian Pricing Announced for 2026 INFINITI QX60

MISSISSAUGA, Ont. - Refreshed with a stunning new look and additional intuitive technologies, the [2026 INFINITI QX60](#) will be on sale at INFINITI retailers nationwide this fall with starting Manufacturer's Suggested Retail Prices (MSRP¹) of CA\$66,945 (CA\$70,498 selling price²). The first-ever QX60 SPORT grade, which elevates the model with its most statement-making appearance yet, is priced from CA\$69,945 (CA\$73,498 selling price²).

The stunning makeover for QX60 takes inspiration from the dramatic *Artistry in Motion* unveiled on the all-new 2025 INFINITI QX80. For QX60, the new look incorporates a redesigned grille inspired by the intersecting shapes of a serene bamboo forest; an illuminated, three-dimensional INFINITI emblem; and a restyled lower bumper that gives the grille a floating effect. The daytime running lights (DRLs) now recall the digital piano key style incorporated on QX80, while from behind QX60 appears lower and wider, thanks to cleaner surfacing on the liftgate and rear fascia. Elegant 20-inch wheels are standard on LUXE grade, and there are sculptural new wheel designs for AUTOGRAPH grades. A particular highlight in the colour palette is QX60's nature-inspired Deep Emerald paint.

Delivering on the INFINITI promise of technology that seamlessly integrates into and enhances the drive, the 2026 QX60 adds several powerful new features. Those include dual 12.3-inch displays with Google built-in³ with always-updated Google Maps for simple and efficient navigation; Klipsch® premium sound systems with up to 20 speakers; ProPILOT Assist 2.1⁴ to allow attentive drivers to take their hands off the wheel in certain freeway driving scenarios; and several new camera views, including Invisible Hood View⁵, which uses advanced image processing to take footage from the vehicle's exterior cameras to project an image of what's directly underneath the vehicle onto the in-car displays. which uses advanced image processing to take footage from the vehicle's exterior cameras to project an image of what's directly underneath the vehicle onto the in-car displays.
